FOUNDRY RESERVE

Refined materials. Redefined possibilities.

The Amarr Foundry Reserve collection defines elevated design in residential and commercial garage doors, combining distinctive, architectural surfaces with precision-crafted Amarr aluminum frames. Featuring finishes enhanced with semi-precious metals and concrete, each door delivers rich texture, depth, and visual impact. This collection brings refined materials into new applications — offering sophisticated design without the traditional constraints of weight or complexity.

Ingot design in Iridescent Bronze

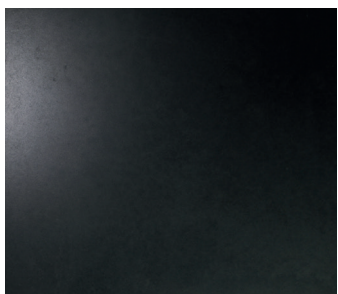

AERIS

The Aeris design embraces the essence of modern minimalism, defined by intentional restraint and a clean, uninterrupted surface. Free from unnecessary ornamentation, it delivers a smooth, consistent appearance that highlights simplicity and balance. Aeris offers a refined, contemporary aesthetic — bringing an understated sophistication to any setting.

ASTRAL

The Astral design draws inspiration from the vast, quiet beauty of celestial landscapes. Echoing the softly textured surface of the moon, its finish reveals subtle variation and depth — creating a smooth yet visually dimensional appearance. Refined and atmospheric, Astral brings a grounded interpretation of cosmic influence, offering a distinctive and elevated presence in modern architectural design.

INGOT

The Ingot design draws inspiration from the moment molten metal is formed into a solid, refined shape. Named for the cast blocks that define strength and structure, Ingot reflects this sense of transformation and precision. Its multidimensional surface captures subtle shifts in depth and light — creating a dynamic yet controlled aesthetic that conveys strength, balance, and modern industrial sophistication. While our process does not involve heat, it perfectly emulates the truly special texture of metal when it is first cast with fire.

PANTHEON

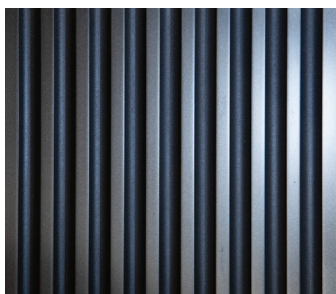

The Pantheon design draws inspiration from the enduring strength and symmetry of classical Greek and Roman architecture. Reflecting the foundational role of ancient columns, it conveys a sense of stability, permanence, and structural elegance. Defined by bold, pronounced vertical lines, Pantheon delivers a striking and confident aesthetic — bringing a timeless architectural presence to modern garage door design.

The Amarr Foundry Reserve collection brings advanced material innovation into garage door design, reimagining materials once limited by weight or fragility — such as semi-precious metals and concrete — into refined, high-performance surfaces.

Paired with the precision-engineered Amarr 3552 aluminum frame, each door integrates these elevated finishes into a durable, modern system — delivering sophisticated design, structural integrity, and a truly distinctive presence. Individually crafted, no two doors are exactly alike ensuring every installation is a one-of-a-kind expression of architectural design.

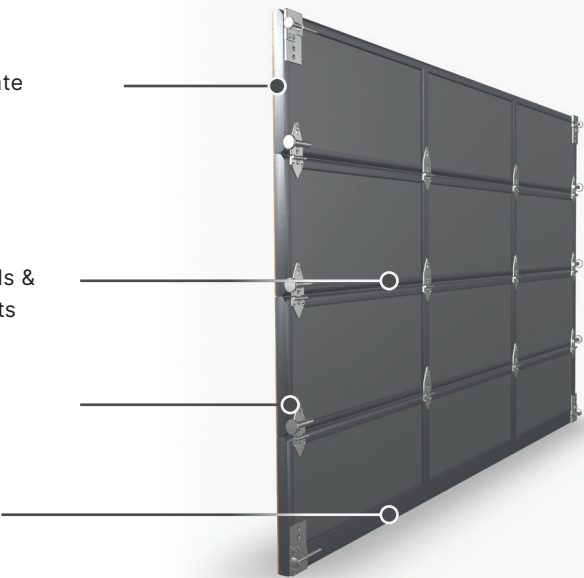

CONSTRUCTION

Tough, compact exterior laminate panels with premium finish

2" thick extruded aluminium rails & stiles – available in 1" increments

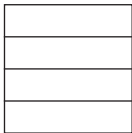

Commercial grade hardware

Weather seal

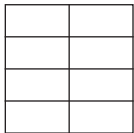

PANEL CONFIGURATION

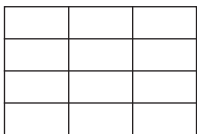

For door widths ≤10'

1 Panel

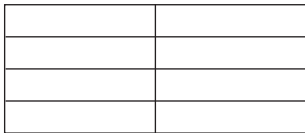

2 Panel

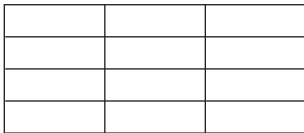

3 Panel

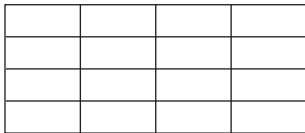

For door widths ≥10'2"

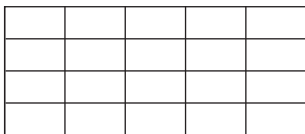

2 Panel
